Low Level Alarm Controller

Model ARB-LA01

DESCRIPTION

The Low Level Alarm Controller monitors the level of liquids (detergents, water, oil, etc), by detecting if the level of the liquid drops below the low-level sensor. This controller can monitor several liquids simultaneously, using one to six sensors. When the controller detects the level of one of the liquids drop below the low-level sensor, an alarm will sound, the Remote Alarm LED turn on, as well as the product LED corresponding to the sensor that detected the drop. The controller consists of a hermetically sealed plastic enclosure containing the circuit board with 8 LED's visible from outside the enclosure. The LED's are Power (Green), Remote Alarm (Red), and one for each of the six sensors (Red).

*Float Level Sensors are also available
