High/Low Level Alarm

Model ARB-LA02

DESCRIPTION

The High/Low Level Alarm monitors the level of liquids (detergents, water, oil, etc), detecting if the level of the liquid drops below or rises above certain levels. This controller can monitor several liquids simultaneously, using up to 3 high level and 3 low level sensors.

When one of the liquids drops below or rises above certain levels, the alarm will sound, the remote alarm LED and the LED of that sensor will activate. The controller consists of a sealed plastic enclosure containing a micro controlled circuit board with 8 LED's visible from outside the enclosure. The LED's are Power (Green), Remote Alarm (Red), three for the Low Level sensors (Red) and three for the High Level sensors (Yellow).
